

ASSIGNMENT 2

This is a charity shop called Happy Paws Charity Shop.

We can donate items to help animals by adding them to a cart and completing a checkout form.

Bootstrap Usage

The following Bootstrap components are used:

- Navbar
- Grid system
- Cards (for the items)
- Buttons
- Forms

JavaScript Functionality

JavaScript is used to: display donation items, manage the shopping cart, increase and remove donation amounts, calculate subtotal, discounts, tax, and total, validate the checkout form, display a confirmation message.

Discounts: 10% for 3 or more donations 20% for 5 or more donations

Checkout and Confirmation:

The checkout form is hidden at first and becomes visible when we click the Checkout button. After we submit a valid form, a confirmation section appears showing: user details, donated items and amounts, subtotal, discount, tax, and final total.

If e.g. we put a non valid email in the checkout form the page will give us a red mark and if we correct it it gives a checkmark.

Checkout

First name	Last name	
Barnabás	Laki	
Email	Phone	
test@test.test	1234567	
Address		
Arbeitergasse		
City	ZIP Code	Country
Krems	3500	Austria
<input checked="" type="checkbox"/> I understand that I won't really buy anything.
